

1/5

1

A cross-sectional view of a multi-layered structure. The structure consists of several layers, labeled 2 through 7 from right to left. Layer 2 is the outermost layer on the right, followed by layer 3, then layer 4, layer 5, layer 6, and layer 7 is the innermost layer on the left. The layers are separated by thin interfaces. Two specific regions are marked with brackets at the bottom: T1 is located within layer 7, and T2 is located within layer 6. The layers are filled with different hatching patterns: layer 2 has diagonal lines sloping down to the right; layer 3 has diagonal lines sloping up to the right; layer 4 has diagonal lines sloping down to the left; layer 5 has diagonal lines sloping up to the left; layer 6 has diagonal lines sloping down to the right; and layer 7 has diagonal lines sloping up to the right.
